

FLAMINGO MARKETPLACE

Homepage, Marketplace Architecture & SEO Implementation Specification

Website: flamingo.com.ng

Initial geographic focus: Gidan Kwano / FUT Minna and Minna, Niger State

Purpose: Reposition Flamingo as a discoverable, trusted local digital marketplace.

Implementation Priority

The first development sprint should focus on homepage repositioning, fixing property loading, marketplace categories, permanent listing URLs, location architecture, the Post an Ad workflow, Gidan Kwano property inventory, and technical SEO.

1. Reposition the Homepage

The existing student-focused positioning should no longer be the principal homepage H1 or SEO message. Flamingo should be immediately understandable as a Minna-focused marketplace.

Recommended SEO title:

Flamingo - Online Marketplace in Minna | Buy, Sell, Rent & Find Services

Meta description:

Buy, sell and discover products and services in Minna on Flamingo. Find houses for rent, land, cars, phones, electronics, furniture, food, internet services and more around Gidan Kwano, Bosso and Minna.

Main homepage headline:

Everything Minna. One Marketplace.

Supporting text:

Buy, sell, rent and discover what you need around Minna. Find properties, vehicles, phones, electronics, household items, services, food, internet and more.

2. Make Search the Centre of the Homepage

Search and posting should be among the most visually prominent actions on the homepage.

Search prompt:

What are you looking for?

Placeholder:

Search houses, cars, phones, furniture, services...

Controls:

Location | Category | SEARCH

Primary action:

POST AN AD - FREE

3. Expand the Marketplace Categories

Category	Examples
Property	Houses for Rent, Land, Shops, Houses for Sale, Student Accommodation
Vehicles	Cars, Motorcycles, Tricycles, Spare Parts
Phones & Tablets	Phones, Tablets, Accessories
Electronics	Laptops, TVs, Appliances, Audio
Home & Furniture	Furniture, Kitchen, Household Items
Jobs	Vacancies, Part-Time, Student Jobs
Services	Artisans, Repairs, Professional Services
Food & Drinks	Restaurants, Meals, Groceries
Internet	Home, Mobile and Business Internet

4. Build Location into the Architecture

Every advert should contain State -> City -> Area. Example: Niger State -> Minna -> Gidan Kwano.

Recommended indexable location/category paths:

/minna/
/minna/properties/
/minna/houses-for-rent/
/minna/land-for-sale/
/minna/cars/
/minna/phones/
/minna/furniture/
/minna/gidan-kwano/
/minna/gidan-kwano/houses-for-rent/
/minna/gidan-kwano/land-for-sale/
/minna/bosso/houses-for-rent/
/minna/tunga/houses-for-rent/

5. Give Every Advertisement Its Own Webpage

Each public advert should have a permanent, crawlable URL with its own title, price, location, description, photographs, specifications, date posted, advertiser details, verification status and contact actions.

Example listing: 3 Bedroom Bungalow for Rent in Gidan Kwano, Minna

Example SEO title: 3 Bedroom Bungalow for Rent in Gidan Kwano, Minna | Flamingo

Example path: /minna/gidan-kwano/houses-for-rent/3-bedroom-bungalow-gidan-kwano-18452

6. Build a Serious Property Marketplace First

Property should be the first category developed to full marketplace depth because it provides a strong use case for local search and Gidan Kwano/FUT Minna discovery.

Recommended listing card fields: price, precise area, bedrooms, bathrooms, parking, water/borehole, verification status and date posted.

Detail-page actions: Call Advertiser | WhatsApp | Book Inspection | Save Property | Report Listing.

Filters: Rent/Sale, price range, bedrooms, property type, furnished/unfurnished, area, newest and verified.

7. Introduce Flamingo Verified

Verification can become a key local trust differentiator. Badge definitions must be explicit and must not imply a transaction guarantee.

Phone Verified: phone number confirmed.

Seller Verified: identity/business information checked.

Property Verified: property existence and basic listing information physically confirmed by the relevant Flamingo/Flourish process.

8. Fix the Property API / Loading Problem

Treat property loading failures as Priority 1. Investigate API availability, CORS, authentication/token expiry, frontend exceptions, database queries and deployment configuration. Public listing content should preferably be server-rendered or statically rendered/indexable.

9. New Homepage Sequence

FLAMINGO

Everything Minna. One Marketplace.

MINNA MARKETPLACE GUIDE

Social | Contact | Footer

10. Create a Minna Information Centre

Create a Flamingo Minna Guide containing useful, locally grounded content supported by real marketplace observations and data rather than generic keyword-heavy articles.

1. Houses for Rent in Gidan Kwano, Minna: Complete 2026 Guide
2. How Much Does It Cost to Rent a House in Minna?
3. Best Areas to Live in Minna
4. Student Accommodation Around FUT Minna Gidan Kwano
5. Gidan Kwano Property and Rental Guide
6. How to Find Genuine Houses for Rent in Minna
7. Land for Sale in Gidan Kwano: What Buyers Should Know
8. Gidan Kwano vs Bosso for FUT Minna Students
9. Where to Buy Affordable Furniture and Household Items in Minna
10. How to Buy and Sell Safely Online in Minna

11. Technical SEO Specification

- XML sitemap automatically updated as adverts are created, changed or removed.
- robots.txt that permits crawling of public marketplace/category/listing pages while excluding private dashboards.
- Canonical URLs to control duplicate category and listing URLs.
- Open Graph metadata for good presentation when listings are shared.
- Appropriate Schema.org structured data: Organization, WebSite, BreadcrumbList and relevant product/offer/listing/location information.
- Meaningful image alt text generated from listing information.
- Fast, mobile-first pages.
- Appropriate handling of expired listings and 404 pages.
- Google Search Console and suitable analytics configuration.

12. Branding Architecture

Use Flamingo Marketplace as the marketplace identity while retaining Flamingo Food, Flamingo Internet and Flourish Real Estate as distinct parts of the broader ecosystem.

Suggested architecture:

Flamingo Marketplace

Flamingo Food

Flamingo Internet

Flourish Real Estate

Recommended First Development Sprint

1. Homepage repositioning
2. Fix property loading
3. Marketplace categories
4. Individual listing URLs
5. Location architecture
6. Post an Ad workflow
7. Populate genuine Gidan Kwano property listings
8. Sitemap, metadata and structured data

Strategic objective: Make Flamingo useful, technically understandable, locally authoritative and publicly documented so that users, search engines and AI-assisted discovery systems have strong evidence for identifying it as a relevant Minna marketplace.
